

Huttwil, 18.01.2024

FUNCTIONS OF THE FIT E-BIKE CONTROL APP ARE NOW FREE

With the start of the year, the Swiss e-bike system provider Biketec GmbH from Huttwil announced that all functions of its FIT E-Bike Control app are to be free of charge for all users. In doing so, the company is fulfilling the great desire of e-bike fans and making the extended riding experience freely accessible to all. Another new service: Users can now ask questions about the app directly via the Help button within the application.

E-bike fans are delighted: Biketec GmbH – known for its modular FIT e-bike system – today announced its decision to make the experience even more customer-friendly for all owners of an e-bike with the FIT 2.0 system. Since January 16, 2024 they have been able to use all the functions of the FIT E-Bike Control app free of charge.

The FIT E-Bike Control app allows users to fully control, monitor and adjust their e-bike to their needs. With the decision to make all functions available free of charge, Biketec GmbH is confirming its commitment to promoting sustainable mobility and providing outstanding technologies for e-bike fans.

“Our vision at Biketec is to make the joy of e-biking accessible to everyone. By offering all the features of our FIT E-Bike Control app free of charge and combining them in one place, we want to ensure that every rider can use the full potential of their e-bike,” said Ivica Durdevic, CEO of Biketec GmbH. *“This decision underlines our determination to respond specifically to customer wishes and needs while contributing to the spread of sustainable mobility.”*

To put an even greater focus on customer satisfaction, questions and feedback on the app are now also possible directly via the Help button within the FIT app. This facilitates mutual communication and enables faster assistance from FIT’s support team.

The versatile functions of the FIT E-Bike Control app include:

- Assistance level adjustment: The fine tuning of motor assistance to suit the terrain and personal preferences.
- Checking the tire pressure: Adjustment of the optimal tire pressure and transmission of data in real time via Bluetooth using additionally mountable tire pressure sensors
- Route planning and navigation: Possibility to save, plan and follow routes with integrated turn-by-turn navigation or via connection with Komoot
- Smartphone as display: FIT Drive Screen with all driving data on the smartphone
- Digital locking: Locking and unlocking the electronic components of the e-bike conveniently via smartphone, display or remote control

The FIT E-Bike Control app is available for both iOS and Android devices and can be downloaded from the App Store or Google Play.
